

Home — copy and what to use

Work down the page in order. **Left column is the copy** — select it and paste it in. **Right column is the setting** — the element, the heading level, the size. Nothing to look up anywhere else.

Where the right column says *Label*, that's the small uppercase line — Text Block, Inter 500, 12px, 2.4px letter spacing, colour #CBB1A5. It appears eleven times on this page, so set one up and duplicate it.

Container — 1 column, centred text, top padding 70px, no bottom padding.

Line 1 — Label.

Headline — Title element, H1, Headings set. Size 46px desktop. Max width 20 characters — set the column to 60% and centre it.

Paragraph — Text Block using the **Lead** set (Inter 300, 21px, LH 1.6). Width 52ch.

Buttons — Button element ×2 in a 1/1 row, 16px gap. First = *Large, Primary* (rose fill #CBB1A5, text #3A2D28). Second = *Large, Custom*: transparent background, 1px border rgba(58,45,40,.2).

02 HERO PHOTOGRAPH — FULL BLEED

Container — 100% width, no padding, height 620px, background image set to *cover / centre*.

The fade — no curves anywhere on this site. Instead add a Column inside, height 58%, bottom-aligned, background gradient transparent → #FDFBF7. That's what dissolves the photo into the page.
